Back up SQL Server resource groups 1

Back up SQL Server resource groups

You can back up a resource group on demand from the Resources page. If a resource group has a policy attached and a schedule configured, then backups occur automatically according to the schedule.

Steps

1. In the left navigation pane, click **Resources**, and then select the appropriate plug-in from the list.
2. In the Resources page, select **Resource Group** from the **View** list.

You can search the resource group either by entering the resource group name in the search box, or by clicking , and then selecting the tag. You can then click  to close the filter pane.

3. On the **Resource Groups** page, select the resource group that you want to back up, and then click **Back up Now**.
4. On the **Backup** page, perform the following steps:
 - a. If you have associated multiple policies with the resource group, from the **Policy** drop-down list, select the policy that you want to use for backup.

If the policy selected for the on-demand backup is associated with a backup schedule, the on-demand backups will be retained based on the retention settings specified for the schedule type.

- b. After backup, select **Verify** to verify the on-demand backup.

The **Verify** option in the policy applies only to scheduled jobs.

- c. Click **Backup**.

5. Monitor the operation progress by clicking **Monitor > Jobs**.
