Overview of REST APIs

REST APIs can be used to perform several SnapCenter management operations. REST APIs are exposed through the Swagger web page.

You can access the Swagger web page available at *https://<SnapCenter_IP_address_or_name>:<SnapCenter_port>/swagger/* to display the REST API documentation, as well as to manually issue an API call.

The plug-ins that support REST APIs are:

- Plug-in for Microsoft SQL Server
- Plug-in for SAP HANA Database
- Custom Plug-ins
