Import CA certificates ..... 1

# Import CA certificates

You must import the CA certificates to the SnapCenter Server and the Windows host plug-ins using the Microsoft management console (MMC).

## Steps

1. Go to the Microsoft management console (MMC), and then click **File > Add/Remove Snapin**.
2. In the **Add or Remove Snap-ins** window, select **Certificates** and then click **Add**.
3. In the **Certificates snap-in** window, select the **Computer account** option, and then click **Finish**.
4. Click **Console Root > Certificates – Local Computer > Trusted Root Certification Authorities > Certificates**.
5. Right-click on the folder “Trusted Root Certification Authorities”, and then select **All Tasks > Import** to start the import wizard.
6. Complete the wizard, as follows:

In this wizard window...	Do the following...
Import Private Key	Select the option <b>Yes</b> , import the private key, and then click <b>Next</b> .
Import File Format	Make no changes; click <b>Next</b> .
Security	Specify the new password to be used for the exported certificate, and then click <b>Next</b> .
Completing the Certificate Import Wizard	Review the summary, and then click <b>Finish</b> to start the import.

Importing certificate should be bundled with the private key (supported formats are: \*.pfx, \* p12, \*.p7b).

7. Repeat Step 5 for the “Personal” folder.
